

SHARIM ANSARI

Senior Full Stack Developer | MERN Stack | PHP | Python | AI Integration | Enterprise Automation | API Integrations

Full Stack Developer with 7 years of experience building scalable web applications, enterprise workflow automation systems, procurement platforms, and logistics solutions using MERN Stack, PHP, React.js, Node.js, MySQL, and MongoDB. Strong background in REST API integrations, marketplace/carrier integrations, Zoho Creator/Catalyst, Microsoft PowerApps, AWS services, and Agile/Scrum delivery.

asharim111@gmail.com | +965 989-70432 | Kuwait | [linkedin.com/in/sharim-ansari](https://www.linkedin.com/in/sharim-ansari) | github.com/asharim111

SKILLS

Languages: JavaScript, TypeScript, PHP, Python, HTML, CSS

Frontend: React.js, React Router, Bootstrap, jQuery, responsive web development

Backend: Node.js, Express.js, REST APIs, FastAPI, CakePHP, CodeIgniter, Laravel, API integration

AI & Security: OpenAI, Anthropic (Claude), and Groq APIs, LLM application integration, Microsoft Presidio, Microsoft Entra ID (Azure AD) SSO, OAuth 2.0, OWASP Top 10, RBAC, audit logging

Databases: MongoDB, MySQL, query optimization, data modeling, Microsoft SQL Server, PostgreSQL, Redis

Cloud & Tools: AWS EC2, AWS S3, AWS SQS, AWS SES, Git, Bitbucket, JIRA, Linux Server, Docker, Selenium

Platforms: Zoho Creator, Zoho Catalyst, Microsoft PowerApps, WordPress, Joomla

Domain Experience: Ticket management, procurement workflows, logistics tracking, ERP-style systems, marketplace synchronization, AI Governance, data loss prevention

Methodologies: Agile, Scrum, sprint planning, cross-functional collaboration

WORK EXPERIENCE

AI Rashed Holdings, Ardiya - KW

Sep 2025 - Present

Full Stack Developer

- Architect and build an internal AI gateway (FastAPI, React.js, PostgreSQL, Redis, Docker) that routes employee ChatGPT/Claude usage through a two-layer data loss prevention pipeline, enforcing Entra ID SSO, department-level policy controls, and audit logging with real-time admin alerting on every flagged prompt.
- Design and develop a MERN-based Ticket Management System across IT, business, and procurement modules, centralizing 3+ internal workflows for issue tracking, service requests, and approvals.
- Automate 4 procurement workflow stages - Material Requests, Purchase Orders, invoice handling, and ticket closure - reducing manual handoffs and improving operational turnaround.
- Build and deploy enterprise automation solutions using Zoho Creator, Zoho Catalyst, REST APIs, and serverless functions to digitize multiple internal workflows and improving cross-department visibility.

Phoenix Biz Solutions, Thane - IN

Aug 2022 - Aug 2025

Web Developer

- Built and maintained business-critical, ERP-style software using CakePHP, MongoDB, and MySQL, supporting marketplace product synchronization, order processing, and multi-carrier logistics operations.
- Integrated carrier APIs including APG, CTExpress, and Posteltaliane, along with marketplace APIs such as Rakuten, Joom, and eBay, improving synchronization efficiency by 25%.
- Built a shipment tracking platform (dmstrack.com) delivering live updates across 3,500+ global carriers, improving logistics visibility and operational tracking.
- Optimized backend services using Node.js, reducing API response times by 20% and improving user experience.

myMRPlace, Thane - IN

Sep 2019 - Jul 2022

Full Stack Developer

- Built and maintained a CodeIgniter and MySQL-based platform (mymrplace.com) connecting buyers and suppliers in the market research industry, supporting international research operations and supplier collaboration.
- Improved website functionality and backend performance, contributing to a 20% reduction in page load time.
- Served as Scrum Master for Agile sprints, facilitating stand-ups, prioritization, and sprint execution.
- Refactored MySQL queries to improve data retrieval speed and backend efficiency.

EVOLUTION CO, Mumbai - IN

July 2019 - Sep 2019

PHP Developer Intern

- Contributed to building a dynamic website using Joomla and Joomla Component Builder (JCB), while also involved in software module design, development, and support. Additionally, gained hands-on experience with Facebook and Instagram APIs.

PROJECTS

AI Gateway — Enterprise DLP Proxy for ChatGPT & Claude	<i>Jun 2026 - Present</i>
Built a secure AI gateway using FastAPI, React.js, PostgreSQL, Redis, and Docker that scans every employee prompt and file attachment through a two-layer DLP engine (Microsoft Presidio + LLM classifier) across 19 detection categories before routing requests to OpenAI, Anthropic, or Groq.	
Pamatec — React Product Showcase Application	<i>Jan 2026 – Jun 2026</i>
Built a React-based single-page application using React Router DOM to display building material products and solutions with a structured, responsive user interface. View live	
Sales Analytics Dashboard — MERN + SQL Server BI Platform	<i>Oct 2025 – Feb 2026</i>
Built a full-stack sales analytics dashboard using React.js, Node.js, Express.js, and Microsoft SQL Server, integrating with an ERP database to deliver real-time KPIs, salesman performance tracking, and profit margin analysis through 12+ interactive charts.	
AI Code Reviewer — MERN Application	<i>Dec 2024 - Feb 2025</i>
Built a MERN stack application integrated with Google Gemini 2.0 Flash to review source code and generate improvement suggestions, automating code quality analysis and development feedback.	

EDUCATION

K. J. Somaiya College of Engineering	
Master of Technology, Information Security — CGPA: 7.68/10	<i>2023 - 2025</i>
Dilkap Research Institute of Engineering and Technology	
Bachelor of Engineering, Computer Engineering — CGPA: 6.80/10	<i>2016 - 2019</i>
Anjuman-I-Islam Abdul Razzak Kalsekar Polytechnic	
Diploma, Computer Engineering — 63.19%	<i>2013 - 2016</i>

CERTIFICATES

- Architecting Solutions on AWS — Coursera [\(verify\)](#)
- DevOps Fundamentals — Udemy [\(verify\)](#)
- Scrum Certification — Udemy [\(verify\)](#)
- Master HTML5, Bootstrap5 & ReactJS from Scratch — Udemy [\(verify\)](#)
- Day to Day Activities of an Agile Scrum Team in a Real Project — Udemy [\(verify\)](#)

PUBLICATIONS

Research Paper, Springer Nature — Presented and published a research paper on ICT-driven sustainable solutions at the 10th International Conference on ICT for Sustainable Development (ICT4SD 2025), included in the Springer Nature Proceedings (Volume 4).
